# 1 Key Properties

Sea Ice key properties

# 1.1.1 Top level properties

Sea Ice key properties

# 1.1.1.1 Name \*

 $Name\ of\ seaice\ model\ code$ 

# 1.1.1.2 Keywords \*

Keywords associated with seaice model code

Enter COMMA SEPERATED list:

### 1.1.1.3 Overview \*

Overview of seaice model.

Enter TEXT:

# 1.2.1 Variables

List of prognostic variable in the sea ice model.

# 1.2.1.1 Prognostic \*

| eieci aii j | prognostic variables in the sea ice component. |
|-------------|--|
|             | Sea ice temperature                            |
|             | Sea ice concentration                          |
|             | Sea ice thickness                              |
|             | Sea ice volume per grid cell area              |
|             | Sea ice u-velocity                             |
|             | Sea ice v-velocity                             |
|             | Sea ice enthalpy                               |
|             | Internal ice stress                            |
|             | Salinity                                       |

Snow temperature - Snow on ice temperature

Snow depth - Snow on ice thickness

Other - please specify:

# 1.3.1 Seawater Properties

Properties of seawater relevant to sea ice

# 1.3.1.1 Ocean Freezing Point \*

Select SINGLE option:

What is the equation used to compute the freezing point (in deg C) of seawater, as a function of salinity and pressure?

| <br>   |
|--|
| $\ensuremath{TEOS\text{-}10}$ - Thermodynamic equation of seawater 2010. |
| Constant - Constant value of seawater freezing point is used.            |
| Other - please specify:  |

# 1.3.1.2 Ocean Freezing Point Value

If using a constant seawater freezing point, specify this value.

Enter FLOAT value:

# 1.4.1 Resolution

Resolution of the sea ice grid

### 1.4.1.1 Name \*

This is a string usually used by the modelling group to describe the resolution of this grid e.g. N512L180, T512L70, ORCA025 etc.

Enter TEXT:

## 1.4.1.2 Canonical Horizontal Resolution \*

Expression quoted for gross comparisons of resolution, eg. 50km or 0.1 degrees etc.

Enter TEXT:

# 1.4.1.3 Number Of Horizontal Gridpoints \*

 $What \ are \ the \ total \ number \ of \ horizontal \ (XY) \ points \ (or \ degrees \ of \ freedom) \ on \ computational \ grid?$ 

Enter INTEGER value:

# 1.5.1 Tuning Applied

Tuning applied to sea ice model component

### 1.5.1.1 Description \*

Provide a general overview description of tuning: explain and motivate the main targets and metrics retained. Document the relative weight given to climate performance metrics versus process oriented metrics, and on the possible conflicts with parameterization level tuning. In particular describe any struggle with a parameter value that required pushing it to its limits to solve a particular model deficiency.

Enter TEXT:

#### 1.5.1.2 Target \*

What was the aim of tuning, e.g. correct sea ice minima, correct seasonal cycle?

Enter TEXT:

#### 1.5.1.3 Simulations \*

Which simulations had tuning applied, e.g. all, not historical, only pi-control?

Enter COMMA SEPERATED list:

### 1.5.1.4 Metrics Used \*

List any observed metrics used in tuning model/parameters

Enter COMMA SEPERATED list:

#### 1.5.1.5 Variables

Which (if any) variables were changed during the tuning process?

Enter COMMA SEPERATED list:

# 1.6.1 Key Parameter Values

Values of key parameters

# 1.6.1.1 Ice Strength

Ice strength  $(P^*)$  in units of N m-2

Enter FLOAT value:

#### 1.6.1.2 Snow Conductivity

Snow conductivity (ks) in units of W m-1 K-1

Enter FLOAT value:

## 1.6.1.3 Ice Thickness In Leads

Minimum thickness of ice created in leads (h0) in units of m

Enter FLOAT value:

#### 1.6.1.4 Additional Parameters

If you have any additional paramterised values that you have used (e.g. minimum open water fraction or bare ice albedo), please provide them here as a comma separated list in the form parameter1: value1, parameter2: value2, etc.

#### Enter COMMA SEPERATED list:

# 1.7.1 Assumptions

Assumptions made in the sea ice model

### 1.7.1.1 Description \*

Provide a general overview description of any \*key\* assumptions made in this model.

Enter TEXT:

#### 1.7.1.2 On Diagnostic Variables \*

Note any assumptions that specifically affect the CMIP6 diagnostic sea ice variables.

#### Enter COMMA SEPERATED list:

#### 1.7.1.3 Missing Processes \*

List any \*key\* processes missing in this model configuration? Provide full details where this affects the CMIP6 diagnostic sea ice variables?

# Enter COMMA SEPERATED list:

### 1.8.1 Conservation

Conservation in the sea ice component

### 1.8.1.1 Description \*

Provide a general description of conservation methodology.

Enter TEXT:

### 1.8.1.2 Properties \*

Which properties conserved in sea ice by the numerical schemes?

| Select MULTIPLE options: |                         |  |
|--------------------------|-------------------------|--|
|                          | Energy                  |  |
|                          | Mass                    |  |
|                          | Salt                    |  |
|                          | Other - please specify: |  |

# 1.8.1.3 Budget \*

For each conserved property, specify the output variables which close the related budgets. as a comma separated list. For example: Conserved property, variable 1, variable 2, variable 3

#### Enter COMMA SEPERATED list:

# 

List any variables which are conserved by \*more\* than the numerical scheme alone (e.g. has correction applied).

Enter COMMA SEPERATED list:

# 2 Grid

Sea Ice grid

# 2.1.1 Top level properties

 $Sea\ Ice\ grid$ 

### 2.1.1.1 Name

 $Name\ of\ grid\ in\ seaice\ model.$ 

Enter TEXT:

#### **2.1.1.2** Overview

Overview of grid in seaice model.

Enter TEXT:

# 2.1.2 Horizontal

Sea ice discretisation in the horizontal

### 2.1.2.1 Grid \*

 $On \ which \ grid \ is \ the \ sea \ ice \ horizontal \ discretisation?$ 

| $\bowtie$ | Ocean grid - Sea ice is horizontally discretised on the ocean grid.            |
|-----------|--|
|           | Atmosphere Grid - Sea ice is horizontally discretised on the atmospheric grid. |
|           | Own Grid - Sea ice is horizontally discretised on its own independent grid.    |
|           | Other - please specify:  |

# 2.1.2.2 Grid Type \*

What is the structure type of the sea ice grid?

# Select SINGLE option:

| Beiec | Select Single option.                                     |  |  |
|-------|---|--|--|
|       | Structured grid   |  |  |
|       | Unstructured grid   |  |  |
|       | Adaptive grid - Computational grid changes during the run |  |  |
| П     | Other - please specify:                                   |  |  |

# 2.1.2.3 Scheme \*

 $What \ is \ the \ horizontal \ discretization \ (advection) \ scheme?$ 

Select SINGLE option:

|            | Finite differences   |
|------------|--|
|            | Finite elements  |
|            | Finite volumes   |
|            | Other - please specify:  |
|            |  |
| 2.1.2.4    | Thermodynamics Time Step *   |
| What is t  | the time step in the sea ice model thermodynamic component in seconds.                   |
| Ente       | r INTEGER value:   |
|            |  |
| 2.1.2.5    | Dynamics Time Step *   |
| What is t  | the time step in the sea ice model dynamic component in seconds.                         |
| Ente       | r INTEGER value:   |
|            |  |
| 2126       | Additional Details   |
|            | ny additional horizontal discretisation details.   |
|            | r TEXT:  |
|            |  |
| 2.1.3      | Vertical   |
| Sea ice    | vertical properties  |
| 2.1.3.1    | Layering *   |
| What typ   | e of sea ice vertical layers are implemented for purposes of thermodynamic calculations? |
|            | Zero-layer - Simulation has no internal ice thermodynamics.                              |
|            | Two-layers - Simulation uses two layers (i.e. one ice and one snow layer).               |
|            | Multi-layers - Simulation uses more than two layers.                                     |
|            | Other - please specify:  |
| _          | Cont. Preme specify.   |
| 2.1.3.2    | Number Of Layers *   |
| If using r | nulti-layers specify how many.   |
| Ente       | r INTEGER value:   |
|            |  |
| 9199       | Additional Details   |
|            | Additional Details  ny additional vertical grid details.                                 |
|            | · ·  |

Enter TEXT:

# 2.2.1 Seaice Categories What method is used to represent sea ice categories? 2.2.1.1 Has Mulitple Categories \* Set to true if the sea ice model has multiple sea ice categories. Select either TRUE or FALSE: True ☐ False 2.2.1.2 Number Of Categories \* If using sea ice categories specify how many. Enter INTEGER value: 2.2.1.3 Category Limits \* If using sea ice categories specify each of the category limits. Enter COMMA SEPERATED list: 2.2.1.4 Ice Thickness Distribution \* Describe the sea ice thickness distribution. Enter TEXT: 2.2.1.5 Other If the sea ice model does not use sea ice categories specify any additional details. For example models that paramterise the ice thickness distribution ITD (i.e there is no explicit ITD) but there is assumed distribution and fluxes are computed accordingly. Enter TEXT: 2.3.1 Snow On Seaice

Snow on sea ice details

### 2.3.1.1 Has Snow On Ice \*

Is snow on ice represented in this model?

Select either TRUE or FALSE:

\_\_\_\_\_ True \_\_\_\_\_ False

# 2.3.1.2 Number Of Snow Levels \*

Number of vertical levels of snow on ice?

Enter INTEGER value:

# 2.3.1.3 Snow Fraction \*

Describe how the snow fraction on sea ice is determined.

Enter TEXT:

# 2.3.1.4 Additional Details

 $Specify\ any\ additional\ details\ related\ to\ snow\ on\ ice.$ 

Enter TEXT:

# 3 Dynamics

Sea Ice Dynamics

| 3.1.1   | Top    | level | proper | rties |
|---------|--------|-------|--------|-------|
| Sea Ice | e Dyna | mics  |        |       |

3.1.1.1 Name

Commonly used name for the dynamics in seaice model.

Enter TEXT:

### 3.1.1.2 Overview

 $Overview\ of\ sea\ ice\ dynamics\ in\ seaice\ model.$ 

Enter TEXT:

# 3.1.1.3 Horizontal Transport \*

Other - please specify:

What is the method of horizontal advection of sea ice?

| Select     | t SINGLE option:   |  |  |  |  |  |
|------------|--|--|--|--|--|--|
|            | Incremental Re-mapping - (including Semi-Lagrangian)                             |  |  |  |  |  |
|            | Prather  |  |  |  |  |  |
|            | Eulerian   |  |  |  |  |  |

 $Sea\ Ice\ Thermodynamics$ 

### 4.1.1.1 Name

 $Commonly\ used\ name\ for\ the\ thermodynamics\ in\ seaice\ model.$ 

Enter TEXT:

#### **4.1.1.2** Overview

 $Overview\ of\ sea\ ice\ thermodynamics\ in\ seaice\ model.$ 

Enter TEXT:

# **4.2.1** Energy

Processes related to energy in sea ice thermodynamics.

# 4.2.1.1 Enthalpy Formulation \*

What is the energy formulation?

| Select | t SINGLE option:  |
|--------|---|
|        | Pure ice latent heat (Semtner 0-layer)  |
|        | Pure ice latent and sensible heat   |
|        | Pure ice latent and sensible heat + brine heat reservoir (Semtner 3-layer)        |
|        | Pure ice latent and sensible heat + explicit brine inclusions (Bitz and Lipscomb) |
|        | Other - please specify:   |
|        |   |

# 4.2.1.2 Thermal Conductivity \*

What type of thermal conductivity is used?

| Select SINGLE option: |                         |
|-----------------------|-------------------------|
|                       | Pure ice                |
|                       | Saline ice              |
|                       | Other - please specify: |

| 4.2.1.3                 | Heat Diffusion *  |  |
|-------------------------|---|--|
| What is the             | he method of heat diffusion?  |  |
|                         | Conduction fluxes   |  |
|                         | Conduction and radiation heat fluxes  |  |
|                         | Conduction, radiation and latent heat transport   |  |
|                         | Other - please specify:   |  |
| 4214                    | Basal Heat Flux *   |  |
|                         | y which basal ocean heat flux is handled?   |  |
|                         | Heat Reservoir - Brine inclusions treated as a heat reservoir.  |  |
|                         | Thermal Fixed Salinity - Thermal properties depend on S-T (with fixed salinity).  |  |
|                         | Thermal Varying Salinity - Thermal properties depend on S-T (with varying salinity.   |  |
|                         | Other - please specify:   |  |
| If you have sea ice lay | Fixed Salinity Value  we selected Thermal properties depend on S-T (with fixed salinity), supply fixed salinity value for each yer.  r FLOAT value: |  |
|                         | Heat Content Of Precipitation * the method by which the heat content of precipitation is handled.   |  |
| Enter                   | TEXT:   |  |
| 4.2.1.7                 | Precipitation Effects On Salinity   |  |
|                         | If precipitation (freshwater) that falls on sea ice affects the ocean surface salinity please provide further details.  Enter TEXT:                 |  |
| 4.3.1 N                 | Mass  |  |
| Processe                | s related to mass in sea ice thermodynamics.  |  |
| 4.3.1.1                 | New Ice Formation *   |  |
| Describe t              | the method by which new sea ice is formed in open water.  |  |
| 4.3.1.2                 | Ice Vertical Growth And Melt *  |  |
| Describe t              | Describe the method that governs the vertical growth and melt of sea ice.   |  |

Enter TEXT:

| 4.3.1.3 I           | ce Lateral Melting *  |
|---------------------|---|
| What is the         | e method of sea ice lateral melting?  |
| Select              | SINGLE option:  |
|                     | Floe-size dependent (Bitz et al 2001)   |
|                     | Virtual thin ice melting (for single-category)  |
|                     | Other - please specify:   |
| 4.3.1.4 I           | ce Surface Sublimation *  |
| Describe th         | e method that governs sea ice surface sublimation.  |
| Enter               | TEXT:   |
| 4.3.1.5 F           | razil Ice *   |
| Describe th         | e method of frazil ice formation.   |
| Enter               | TEXT:   |

# 4.5.1 Ice Thickness Distribution

Ice thickness distribution details.

| 4.5.1.1        | Representation *  |
|----------------|---|
| How is the     | e sea ice thickness distribution represented?                   |
| Selec          | t SINGLE option:  |
|                | Explicit  |
|                | Virtual (enhancement of thermal conductivity, thin ice melting) |
|                | Other - please specify:   |
| 4.6.1 I        | ce Floe Size Distribution                                       |
| Ice floe-s     | size distribution details.                                      |
| 4.6.1.1        | Representation *  |
| How is the     | e sea ice floe-size represented?                                |
| Selec          | t SINGLE option:  |
|                | Explicit  |
|                | Parameterised   |
|                | Other - please specify:   |
| <b>4.6.1.2</b> | Additional Details  |
| Provide fu     | urther details on any parameterisation of floe-size.            |

| 4.7.1 N        | Melt Ponds  |
| Characte       | eristics of melt ponds.   |
| 4.7.1.1        | Are Included *  |
| Are melt 1     | ponds included in the sea ice model?                            |
| Selec          | t either TRUE or FALSE:   |
|                | True  |
| 4.7.1.2        | Formulation *   |
| What met       | hod of melt pond formulation is used?                           |
|                | Flocco and Feltham (2010)                                       |
|                | Level-ice melt ponds  |
|                | Other - please specify:   |

| 4.7.1.3 Impacts *  What do melt nonds have an impact on?                       |  |
|--|--|
| What do melt ponds have an impact on?  Select MULTIPLE options:                |  |
| Albedo   |  |
|  |  |
| ☐ Freshwater   |  |
| ☐ Heat   |  |
| ☐ Other - please specify:  |  |
| 4.8.1 Snow Processes   |  |
| Thermodynamic processes in snow on sea ice                                     |  |
| 4.8.1.1 Has Snow Aging *   |  |
| Set to True if the sea ice model has a snow aging scheme.                      |  |
| Select either TRUE or FALSE:   |  |
| ☐ True ☐ False   |  |
| 4.8.1.2 Snow Aging Scheme  Describe the snow aging scheme.                     |  |
| Enter TEXT:  |  |
| 4.8.1.3 Has Snow Ice Formation *   |  |
| Set to True if the sea ice model has snow ice formation.                       |  |
| Select either TRUE or FALSE:   |  |
| ☐ True ☐ False   |  |
| 4.8.1.4 Snow Ice Formation Scheme  |  |
| Describe the snow ice formation scheme.  |  |
| Enter TEXT:  |  |
| 4.8.1.5 Redistribution *   |  |
| What is the impact of ridging on snow cover?                                   |  |
| 4.8.1.6 Heat Diffusion *   |  |
| What is the heat diffusion through snow methodology in sea ice thermodynamics? |  |
| Select SINGLE option:  |  |
| Single-layered heat diffusion  |  |

| Multi-layered heat diffusion |
|------------------------------|
| Other - please specify:      |

# 5 Radiative Processes
